Bangalore, India | +91 8123636969 | shreyaspralhadjoshi@gmail.com | <http://www.linkedin.com/in/shreyaspralhadjoshi>

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student at Jyothy Institute of Technology (VTU), with coursework and internship completed as of May 2026. Hands-on experience in Python, Machine Learning, Natural Language Processing, and LLM-based application development. Built production-grade AI and data science tools during an internship at Qspiders and published peer-reviewed research in an international journal. Actively seeking a full-time position in Data Science, Machine Learning, or AI Engineering.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript

AI & Machine Learning: Machine Learning, NLP, LangChain, GPT-4o, RAG Pipelines, Feature Engineering, Model Evaluation

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, Statistical Analysis, Data Visualization

Frameworks & Libraries: Django, Flask, Streamlit, React.js

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Google Colab, VS Code, Postman, REST APIs

Languages Known: English (Professional) | Kannada (Native) | Hindi (Conversational) | Telugu (Conversational)

INTERNSHIP EXPERIENCE

Data Science Intern — Qspiders (Test Yantra Software Solutions Pvt. Ltd.), Bangalore | January 2026 – May 2026

- Analyzed datasets using Pandas and NumPy; built and evaluated supervised ML models with Scikit-learn using accuracy, precision, recall, and F1 score
- Generated business insight visualizations using Matplotlib and Seaborn; streamlined repetitive data processing workflows with Python scripting
- Delivered three end-to-end AI and ML projects — CodeLens, PricePilot AI— as structured milestones under the internship program

PROJECTS

CodeLens – AI-Powered Developer Learning Platform

Tech Stack: Python, GPT-4o, LangChain, Streamlit, ChromaDB | March – May 2026

- Developed a multi-module AI platform combining code analysis, bug detection, SQL generation, Excel formula assistance, and developer tutoring into a single unified tool
- Engineered a context-aware RAG pipeline using LangChain and ChromaDB for document-grounded responses with live GPT-4o streaming chat
- Integrated GitHub repository support with branch-level analytics, project import workflows, and AI-powered code documentation generation

PricePilot AI – Dynamic Pricing Engine

Tech Stack: Python, Django, Machine Learning, REST APIs | January – March 2026

- Built an ML-driven dynamic pricing engine using demand forecasting and customer behavior analytics to optimize pricing for e-commerce platforms
- Trained supervised regression and classification models on historical sales data; deployed pricing logic via a Django backend with REST API endpoints
- Designed interactive dashboards to monitor pricing trends, inventory levels, revenue performance, and profit margins for data-driven decision-making

Shabamorix Hire – AI-Powered Virtual Interviewer

Tech Stack: Python, NLP, Machine Learning, Flask/Django | August 2024 – November 2025

- Developed an NLP-based virtual interviewer leveraging sentiment analysis and keyword extraction to objectively score and evaluate candidate responses
- Implemented adaptive questioning logic that dynamically adjusts interview difficulty based on candidate response quality and performance signals
- Architected a scoring and feedback pipeline supporting unbiased candidate assessment at scale; findings peer-reviewed and published in IJRPR

PUBLICATION

Shabamorix Hire: An AI-Powered Virtual Interview, Resume Intelligence and Recruitment Analytics Platform

International Journal of Research Publication and Reviews (IJRPR), 2025

EDUCATION

B.E. in Computer Science Engineering | Jyothy Institute of Technology (VTU), Bangalore | CGPA: 7.5 / 10 | May 2026

Class XII – PUC (Science) | Jnana Sweekar PU College, Bangalore | 70% | May 2022

Class X – CBSE | Alpine Public School, Bangalore | 60% | March 2020

EXTRACURRICULAR ACTIVITIES

NCC-JIT

- Proud NCC Cadet; earned an 'A' grade in NCC B & C Certificate Examinations; participated in CATC Camp — demonstrating discipline and leadership

FPV Drone Assembly & Flight Operations | September – December 2025

- Designed, assembled, and field-tested an FPV drone — frame, motors, ESC wiring, flight controller setup, and calibration

Rotaract Club of JIT: Co-Fundraising Chair & Co-Membership Chair — led community outreach and member recruitment initiatives
