PROFESSIONAL SUMMARY

Motivated Computer Science Engineering graduate with a strong foundation in Python, software development, Artificial Intelligence, Machine Learning, and data-driven problem solving. Experienced in building end-to-end projects using Python and modern AI technologies, including LLM-based applications. Published international research author with internship experience in software and AI development. Quick learner, collaborative team player, and technology enthusiast seeking to launch a successful career in software engineering and AI-driven roles.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript

AI & Machine Learning: Machine Learning, NLP, LangChain, GPT-4o, RAG Pipelines, Feature Engineering, Model Evaluation

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, Statistical Analysis, Data Visualization

Frameworks & Libraries: Django, Flask, Streamlit, React.js

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Google Colab, VS Code, Postman, REST APIs

Languages Known: English (Professional) | Kannada (Native) | Hindi (Conversational) | Telugu (Conversational)

CERTIFICATIONS

AWS Academy Cloud Developing — Amazon Web Services (AWS Academy)

Introduction to Agent Skills — Anthropic

Building with the Claude API — Anthropic

Introduction to Model Context Protocol — Anthropic

Claude Code in Action — Anthropic

INTERNSHIP EXPERIENCE

Data Science Intern — *Spiders (Test Yantra Software Solutions Pvt. Ltd.), Bangalore* | January 2026 – May 2026

- Analysed 5,000+ data records using Pandas and NumPy, built and evaluated supervised ML models with Scikit-learn across 4 metrics — accuracy, precision, recall, and F1 score
- Produced more than 3 business insight dashboards using Matplotlib and Seaborn, reduced manual data processing time by approximately 40% through Python workflow automation — cutting per-cycle processing from ~5 hours to ~3 hours
- Collaborated with the internship team to deliver two AI and ML projects — PricePilot AI and CodeLens — as core deliverables of the 5-month internship program

PROJECTS

CodeLens – AI-Powered Developer Learning Platform (*Internship Project*)

Tech Stack: Python, GPT-4o, LangChain, Streamlit, ChromaDB | March – May 2026

- Developed a multi-module AI platform with 5 integrated tools — code analysis, bug detection, SQL generation, Excel formula assistance, and developer tutoring — into a single unified system
- Engineered a context-aware RAG pipeline using LangChain and ChromaDB, implementing cosine similarity-based retrieval and prompt engineering to improve response grounding and reduce hallucination — enabling document-grounded answers with live GPT-4o streaming
- Integrated GitHub repository support covering 3 key workflows — branch analytics, project import, and AI-powered automated documentation generation

PricePilot AI – Dynamic Pricing Engine (*Internship Project*)

Tech Stack: Python, Django, Machine Learning, REST APIs | January – March 2026

- Built an ML-driven dynamic pricing engine using demand forecasting and customer behavior analytics to maximize revenue for e-commerce platforms
- Trained 2 supervised ML model types — regression and classification — on historical sales data, deployed pricing logic via a Django backend with REST API endpoints
- Designed analytics dashboards monitoring 4 key business metrics — pricing trends, inventory levels, revenue performance, and profit margins — for informed decision-making

Shabamorix Hire – AI-Powered Virtual Interviewer (*Final Year Project*)

Tech Stack: Python, NLP, Machine Learning, Flask | August 2024 – November 2025

- Built an NLP-based virtual interviewer using 2 core techniques — sentiment analysis and keyword extraction — to objectively score and evaluate candidate responses
- Implemented adaptive questioning logic that dynamically adjusts interview difficulty across multiple levels based on real-time candidate performance signals
- Architected a real-time scoring and feedback pipeline built over 15 months, research peer-reviewed and published in International Journal of Research Publication and Reviews (IJRPR)

PUBLICATION

Shabamorix Hire: An AI-Powered Virtual Interview, Resume Intelligence and Recruitment Analytics Platform — *First Author*

International Journal of Research Publication and Reviews (IJRPR)

EDUCATION

B.E. in Computer Science Engineering | Jyothy Institute of Technology (VTU), Bangalore | CGPA: **7.5 / 10** | **May 2026**

Class XII — PUC (Science) | Jnana Sweekar PU College, Bangalore | 70% | **May 2022**

Class X — CBSE | Alpine Public School, Bangalore | 60% | **March 2020**

EXTRACURRICULAR ACTIVITIES

- Proud NCC Cadet, earned an 'A' grade in NCC B & C Certificate Examinations, participated in CATC Camp — demonstrating discipline, leadership and collaborative skills
NCC-JIT — FPV Drone Assembly & Flight Operations | September – December 2025
- Designed, assembled, and field-tested an FPV drone — frame, motors, ESC wiring, and flight controller calibration
- Co-established Jyothy Institute of Technology as the first official NCC Army Wing Drone Training Node — as part of a 2-member team, received formal appreciation from the Director General of NCC

Rotaract Club of JIT: Co-Fundraising & Co-Membership Chair — led community outreach initiatives
